# Exploring local biodiversity

## Pupil worksheet

With an adult, you will be going on an outdoor journey to find out about your local biodiversity.

### Step 1 – Plan your journey

- What risks might you come across outside?
- What can we do to stay safe around these risks?
- Draw a map of the route you will take

### Step 2 – Materials

- Take paper and a pencil to help you record your journey

### Step 3 – The journey

- Note down what you can see and hear
- Write down any questions you think of about biodiversity on your walk
- List one good thing for biodiversity you spot
- List one bad thing for biodiversity you spot

### Step 4 – Back inside

- Compare with other people on the journey – did you spot the same things?
- How you could improve or support local biodiversity?
